

WAYS CHILDREN LEARN

SHOW ME: Create a labeled grid highlighting ways that children learn. Insert at least two different examples illustrating each type of learning with a child. Think about your own childhood experiences. Examples may be toys, activities, skills, YouTube videos, comics, etc. Shared examples from the lesson may not be used within your grid. You may create this using Canva, Adobe Spark Post or Google Slides.

EXPLAIN TO ME: Using Google Docs, briefly how each example connects to the method of learning you placed it under. Ex. Teaching a child how to tie their shoes can be taught in a formal, step by step process that includes examples and/or illustrations. The child must practice it repeatedly in order to improve and eventually be able to do the task independently. Submit finished work to Google Classroom.

INCIDENTAL LEARNING	IMITATIVE LEARNING
TRIAL & ERROR	DIRECTED LEARNING

SCORING GUIDE

CRITERIA	PRESENT	NOT PRESENT
Examples match/fit the learning category (12)		
Appropriate images, videos, links etc for learning examples (8)		
Two examples for every category (8)		
Written explanation showing connection between example and learning category (12)
